Dear friends,

Madeleine, Seeding's Climate Lead, here — join me tomorrow for an easy and fun policy action power hour at lunchtime for NY'ers! (Non NY'ers, please read and bring this to your

communities!).

*Plastics is a major climate justice issue.* And if we don't change course now, plastic's greenhouse gas emissions could grow to account for roughly a fifth of the entire global carbon budget by 2050. **We have to act now to reduce plastic production, usage and disposal.**

😊 The good news is that **this Packaging Reduction & Recycling Infrastructure Act would cut single-use plastic packaging in HALF.** The bill has gained momentum! It has a majority of cosponsors in both houses of the State Legislature and a whopping 33 cities, counties and municipalities have passed resolutions urging the Legislature to pass it this spring.

😞 The bad news is that **Big Plastic, Big Oil, and a number of big consumer brands including PepsiCo, Coca-Cola, and Kraft are working overtime to try to kill or dramatically weaken the bill.**

📣 *That's why your voice in support of this legislation is needed now, before the vote!!*

**RSVP NOW**

**I really hope you can join us tomorrow at noon, and please help spread the word by forwarding this invite to your friends and family!**

In Solidarity,
